WHAT IS CLAIMED IS:

- 1 1. A combined encoder and perceptual encrypter for a file
- 2 of high quality video, said combined encoder and perceptual
- 3 encrypter comprising:
- a. an encoder which encodes the file of high quality
- 5 video as encoded data; and
- 6 b. a perceptual encryption module which perceptually
- 7 encrypts said encoded data to generate restricted
- 8 video data as perceptually encrypted encoded data.

9

- 10 2. A combined decrypter and decoder for a restricted video
- 11 data as perceptually encrypted encoded data, said combined
- 12 perceptual decrypter and decoder comprising:
- a. a perceptual decryption module wherein said
- 14 perceptual decryption module perceptually decrypts
- said perceptually encrypted encoded data to generate
- 16 encoded data; and
- b. an decoder coupled to said perceptual encryption

1	module wherein said decoder decodes the file of
2	encoded data to generate high quality video.
